Notice

National Service Scheme

All the NSS Volunteers and other students are hereby informed that we are going to arrange water conservation activity at Wadholi village, in Taluka Timbakeshwar.

This activity will be in the form of constructing Continuous contour trenches (CCT), which is helpful for water percolation in the ground and helps increase the water level.

All interested NSS and other student volunteers hereby informed to attend the activity on 04/03/2023, at 08:30AM

For any query or details contact your respective NSS department coordinators.

PROGRAM REPORT

Title of the Program: NSS Special Camp - CCT Construction for Water Conservation at Wadhali village.

Date(s): 04/03/2023 **Duration of the activity –** 1 Day

Venue: Wadhali Village, Taluka Trimbakeshwar, Dist. Nashik.

Details of Participants: 52

Name of the Contact Person: Mr. A. M. Supe, Gramsevak, *Wadhali* Village, Taluka Trimbakeshwar, Dist. Nashik.

Introduction:

The National Service Scheme (NSS) Unit of KCT's Late G. N. Sapkal College of Engineering organized a 7-day residential camp in the village of Wadhali, with the aim of engaging NSS volunteers in activities that would benefit the local community. As part of this camp, a significant initiative was undertaken on March 4, 2023, where NSS volunteers worked on digging Continuous Contour Trenches (CCT) near the hilly area of Bhairavnath Temple in Wadhali.

The NSS team, motivated by the spirit of community service and environmental conservation, actively participated in creating 20 CCTs, covering a total area of approx. 2000 cubic meters. These CCTs are an integral part of water conservation efforts in hilly regions like Wadhali.

Continuous Contour Trenches, or CCTs, are a sustainable and effective way to manage water resources in hilly terrain. By creating these trenches along the contours of the land, rainwater runoff is slowed down and directed into the ground, allowing it to percolate and recharge the groundwater. This method helps in retaining water, preventing soil erosion, and ultimately benefiting the local ecosystem, agriculture, and the community's water supply.

The NSS volunteers' dedication and hard work in constructing these CCTs have not only contributed to water conservation in the region but have also promoted the importance of sustainable practices among the villagers. The villagers of Wadhali witnessed firsthand the positive impact of these trenches on water availability and soil quality, which will undoubtedly have lasting benefits for their agricultural and ecological well-being.

This activity exemplifies the NSS unit's commitment to environmental and community development. It aligns with the broader vision of sustainable living and responsible resource management. The NSS unit at KCT's Late G. N. Sapkal College of Engineering remains dedicated to furthering initiatives that create a positive and lasting impact on the communities it serves.
