Notice

National Service Scheme

All the NSS Volunteers and other students are hereby informed that we are going to arrange water conservation activity at the Wadholi village, in Taluka Timbakeshwar.

In this activity, we will be constructing a small water dam at Wadholi village which is helpful for water percolation in the ground and helps increase the water level.

All interested NSS and other student volunteers hereby informed to attend the activity on 1st & 3rd March 2023 at 09:00am at Wadholi village.

For any query or details contact your respective NSS department coordinators.

PROGRAM REPORT

Title of the Program: NSS Special Camp - Dam Construction Activity

Date(s): 01/03/2023 & 03/03/2023 **Duration of the activity –** 2 Days

Venue: Wadholi Village, Taluka Trimbakeshwar, Dist. Nashik.

Details of Participants: 52

Name of the Contact Person: Mr. A. M. Supe, Gramsevak, *Wadholi* Village, Taluka Trimbakeshwar, Dist. Nashik.

Introduction:

A significant and noteworthy activity took place during the 7-day residential NSS Special Camp at the village of Wadholi, held between 1st and 3rd March 2023. In addition to other engaging activities, the NSS Unit organized a Dam Construction project that showcased the dedication and collaborative efforts of 52 enthusiastic NSS Volunteers.

Project Overview:

The Dam Construction activity aimed to create a structure that would serve as a valuable resource for the village and its residents. With access to natural materials such as stones and clay in the vicinity, the NSS Volunteers embarked on a two-day endeavor to build a dam that would be approximately 6 feet in height and 20 feet wide.

Project Execution:

The project commenced on the 1st of March 2023, with NSS Volunteers meticulously selecting and arranging stones and clay to create the foundation of the dam. The construction process involved a systematic approach, with volunteers working in coordination to ensure the dam's structural integrity.

Over the course of two days, the volunteers persevered in the physically demanding task of placing the stones and clay to build the dam. They worked tirelessly, carrying, shaping, and stacking the materials to meet the specified dimensions. The construction site buzzed with energy and determination as the volunteers toiled under the sun, demonstrating their unwavering commitment to the project.

Achievements:

The result of this collective effort was a well-constructed dam measuring approximately 6 feet in height and 20 feet in width. The completed dam represents a significant contribution to the village, as it can serve multiple purposes, including water storage, irrigation, and flood control. It is poised to enhance the village's resilience to natural elements and improve the overall quality of life for its residents.

Community Impact:

The Dam Construction activity showcased the spirit of service and community engagement that defines the NSS Unit of KCT's Late G. N. Sapkal College of Engineering. The project not only

provided a tangible resource to the village but also fostered a sense of unity and shared responsibility among the volunteers.

The community of Wadholi expressed its gratitude for this invaluable contribution. The dam stands as a testament to the positive impact that can be achieved through collaborative efforts and the selfless dedication of young volunteers.

The NSS Unit extends its appreciation to the 52 enthusiastic NSS Volunteers who dedicated their time, energy, and skills to make this project a success. This initiative exemplifies the potential for NSS activities to create lasting positive changes in the lives of the people they serve, reinforcing the importance of community engagement and service.

In conclusion, the Dam Construction activity conducted during the NSS Special Camp serves as an inspiring example of how volunteerism and community involvement can result in tangible benefits and strengthen the bonds between institutions, volunteers, and the communities they serve.
