Problems Encountered and Resource Required

Budgeting is the number one most challenging aspect of event planning. Next might be intimating the colleges about the event. If it is a workshop then inviting mentors will be of primary concern. If it is a competition or something then the prize money, certificates etc. need to be taken care of. Nowadays, inviting celebrities in such events has also become a trend so that can be arranged as well. Estimating the number of people attending the event can be helpful in order to decide the venue etc. and it will also help to plan resources. Keeping a record of such events can be helpful in planning future events, and further events will be carried out without any much effort. It is quite difficult to decide how to distribute and choose winners for this whole event and as well as for every game and competition. It is quite challenging organizing events like this and managing the throughout the whole session. It is a challenging issue to gather students and motivate them for participation. While managing, it's quite a headache to coordinate and manage event with having colleagues and all volunteering students.
